RevdUp + HubSpot

Integration In 4 Easy Steps

✓ **RevdUp Connects To HubSpot In Just A Few Minutes Using A Secure, Read-Only Private App.**

✓ **– No User Seat Required. Below Are The Quick Steps Your Admin Can Follow To Enable The Integration.**

Step-By-Step Instructions:

🕐 Time Required: **5-10 Minutes**

1) Navigate To Private Apps

In HubSpot, Go To:

Settings > Integrations > Private Apps

2) Create A New Private App

A) Click **"Create A Private App"**

B) App Name: *Developer Access For RevdUp*

C) Under **Scopes**, Enable The Following **Read-Only** Permissions:

- Crm.Objects.Deals.Read
- Crm.Schemas.Deals.Read
- Crm.Objects.Contacts.Read
- Crm.Objects.Owners.Read
- Goals.Read Business_units.Read
- Timeline Settings.Users.Read
- Crm.Pipelines.Read

3) Generate & Copy The Access Token

Click **"Create App."** HubSpot Will Generate A Long-Lived Access Token.

⚠️ **Important:** Hubspot Shows The Token **Only Once** – Copy And Store It Securely.

4) Share Credential With RevdUp

Send Us **Just The Access Token** (No Additional Credentials Needed).

Security

This token lets RevdUp pull read-only data via HubSpot's secure API. RevdUp never alters your HubSpot data or ask for user passwords.
